

Overview

A student center that serves all freshmen on campus is a unique feature in Blazer Hall, a freshman residence hall, developed by EdR, which worked in a privatized partnership in cooperation with Academic Privatization, LLC, and the University of Alabama-Birmingham.

Blazer Hall was designed to link with the university dining hall and dining plaza next door. Construction was completed in May 2006 so the building would be in service to handle summer conferences. Financing was accomplished through tax-exempt bonds.

The “suite-style” units have two bedrooms sharing a living area and bathroom. Four students typically occupy this unit. Each fully furnished suite includes a full-size refrigerator. Each bedroom is wired directly to the university computer network and furnished with telephone and cable TV connections. Amenities include extensive programming and study areas throughout the building.

Project Details

Beds	753
Stories	8
Gross Size	206,500 square feet
Developer	EdR in partnership with Academic Privatization, LLC
Completion	May 2006
